

Hello Senators/Representatives/Congressman

I would like you to consider putting yourself in the shoes of a terminally ill patient - you have lived a full life and towards the end you have prepared all your "final arrangements" - now you wait to die - sometimes in an un dignified and painful way - I am quite surprised that this pill was not already available. My husband was recently diagnosed with ALS this past December. I know there are many political considerations & financial ones for our state - however I would ask that this kind of issue has no place in the political arena other than to pass this into law - please picture your loved ones and yourself when you think about your vote. Please feel free to contact me anytime. Thank you.

Sincerely,

Jennifer Mudd/Mizzone
